(01)

AI-Native Climate-Positive Music Distribution Ecosystem

€1.8M EIC Accelerator Grant Request

Market Opportunity: €28.6B Industry Crisis

Independent Artists Face Systemic Exploitation

€8.5B

Independent Artist Market
40% of streaming revenue

8.5M

Artists Trapped
Between Exploitation & Impossibility

15%

YoY Growth
Independent Sector (2x Overall Market)

300M

Tonnes CO₂/Year
ZERO Platforms Track Emissions

Legacy platforms: 15-30% commission FOREVER • No carbon tracking • No blockchain transparency • Zero AI automation

18-24 Month Technology Lead

(03)

First-Mover Advantage in Three Breakthrough Areas

First MCP-Native Platform

Built on Model Context Protocol (Anthropic, 2024). Competitors stuck on 20-year-old architecture.

181 MCP Tools Live

Complete distribution automation. Competitors have ZERO conversational AI capabilities.

PRODUCTION READY

85% Complete

Production-ready platform. Launch in 90 days post-funding, not 18-24 months.

Apollo Intelligence

Live conversational AI. Hit prediction, fraud detection, automated KYC compliance.

TRADITIONAL PLATFORMS

4 HOURS

15 forms • Manual • No guidance

VS

MSC & CO (MCP-NATIVE)

5 MINUTES

One conversation • Apollo AI • Automated

First Climate-Positive Music Platform

Leading the Music Industry's Green Transformation

Real-Time Carbon Tracking

Per-stream emissions using DIMPACT 2024 methodology. No competitor has this capability.

INDUSTRY FIRST

Earth/Percent Partnership

Founded by Massive Attack & Brian Eno. Automatic royalty donations to climate action projects.

Carbon Offset Marketplace

5 verified providers integrated: Gold Standard, Verra, Ecologi, Pachama, Climeworks.

5-YEAR COMPETITIVE MOAT

Competitors would need complete platform rebuild to match sustainability features

■ EU Green Deal Alignment • First music platform contributing to climate targets • Open data API for research

Blockchain-Verified Royalty Transparency

Cryptographic Proof > Trust

IMMUTABLE

Royalty Records on Polygon

Every payment recorded on blockchain. Artists independently verify earnings without trusting platform.

99.97%

Cheaper Than Ethereum

\$0.005 per transaction using Polygon. Ethereum would cost \$200+ per verification.

SMART

Contract Revenue Splits

Automated distribution to collaborators. No manual calculations. Transparent waterfall visualization.

PROOF

Not Trust Required

Artists get cryptographic proof of earnings. Audit trail viewable by anyone. Zero competitors have this.

The music industry has a \$2.5B trust problem. We solve it with cryptographic PROOF.

European Champion: Digital Sovereignty + Jobs

Building EU's First Music Tech Unicorn

■ Digital Sovereignty

- ✓ 100% EU data infrastructure (Frankfurt/Amsterdam)
- ✓ Alternative to US-dominated market (DistroKid/TuneCore)
- ✓ All data in EU datacenters (Supabase EU)
- ✓ Zero transfers to non-EU jurisdictions

■ Job Creation Targets

- ✓ Year 1-2: 15 direct hires (UK engineering, ops)
- ✓ Year 3-5: 50 hires (Berlin, Amsterdam offices)
- ✓ Year 5: 1,000+ sustainable creative jobs
- ✓ Indirect: 200+ jobs (engineers, curators)

□ Regulatory Leadership

- ✓ First platform with full EU regulatory stack
- ✓ GDPR-native (privacy by design)
- ✓ DSA-ready (content moderation)
- ✓ EU AI Act pioneer (compliance model)

◆ Research Contribution

- ✓ Open data API for academic research
- ✓ Training ground for EU AI talent (MCP dev)
- ✓ Climate-tech + music-tech convergence
- ✓ Built on European open-source (PostgreSQL)

Building the first European champion in music distribution—keeping innovation, data, and economic value in Europe

Business Model: €170M Revenue by Year 5

Progressive Economics Aligned with Artist Success

Commission **DECREASES** as artists succeed • Aligns our interests with artist growth

◆ Artists	500,000
▤ Annual Streams	48 Billion
€ Commission Revenue	€48M
■ White-Label B2B	€40M
□ Subscriptions	€60M
◆ Premium Services	€15M
◆ TOTAL REVENUE	€170M

Why EIC Grant? High-Risk R&D VCs Won't Fund

Three Unsolved Problems Requiring Patient Capital

Public Good Innovation

Carbon tracking methodology becomes industry standard • Open data API for research • Benefits entire music ecosystem, not just MSC & Co

INDUSTRY-WIDE IMPACT

Pre-Competitive R&D

Sustainability measurement = unsolved problem • Blockchain adoption faces massive industry resistance • No proven commercial methodology exists

BREAKTHROUGH REQUIRED

Infrastructure-Heavy

70%+ margins only at scale (Year 3+) • Sustainability compliance adds costs without immediate ROI • 24-month payback too long for early-stage VCs

PATIENT CAPITAL NEEDED

Regulatory Complexity

GDPR/DSA/AI Act compliance requires legal resources • Multi-jurisdiction licensing (29 countries) • Carbon accounting standards still emerging

HIGH BARRIER TO ENTRY

THREE UNSOLVED INDUSTRY PROBLEMS requiring high-risk R&D

1 Real-time carbon attribution • 2 Blockchain royalty transparency at scale • 3 AI-native distribution automation

Use of Funds: €1.8M Over 24 Months

Strategic Allocation Across Six Innovation Pillars

30% €540K

🌱 Sustainability R&D

- Carbon tracking engine (DIMPACT 2024)
- Earth/Percent integration
- Offset marketplace (5 providers)
- Academic research partnerships

20% €360K

🔗 Blockchain Infrastructure

- Polygon smart contracts
- Royalty verification system
- NFT functionality
- Copyright registration

20% €360K

💎 AI & Automation

- 181 MCP tools completion
- Hit prediction + fraud detection
- Apollo Intelligence enhancement
- 15-language support

15% €270K

🌐 Distribution Partnerships

- 150+ platform API integrations
- Geographic expansion (Africa, LatAm)
- White-label B2B development
- Enterprise client onboarding

10% €180K

📋 Compliance & Legal

- EU regulatory compliance
- Patent applications (MCP + carbon)
- B-Corp certification
- Trademark registrations

5% €90K

🏢 Operations

- Core team recruitment
- Technical infrastructure
- Contingency buffer
- Office setup

🕒 **24-Month Runway to Break-Even + Series A Readiness**

Team & Roadmap: From 85% → Market Leader

World-Class Team • Proven Track Record • Clear Execution Plan

◆ Founder & CEO: Henry Taylor

14+ years gospel music industry experience • Organized Kingdom World Tour (Kirk Franklin, Maverick City Music) • BSc Biomedical Science + MRes Allied Medicine (LSE Distinction) • Full-stack developer (Next.js, React, PostgreSQL, AI integration) • Published world's first MCP server for music distribution • Festival of Life 2026 at The O2 Arena

Leadership Team Post-Funding (€280K Allocated):

- **Feranmi Ogun** - CTO & Technical Co-Founder
- **Feyi Ogunseyinde** - Head of Regulatory Compliance & Finance
- ◆ **Solomon Ade** - Head of Commercial Partnerships & Distribution
- ◆ **Imisi Aina** - VP of Product & Design
- ▤ **Rebecca Taylor** - Head of Marketing & Artist Growth
- **Opeyemi Kon Ajayi** - Head of Engineering Operations

Q1 2026

■ LAUNCH

- Complete platform
- 50-200 beta artists
- Distribution APIs live

Q2 2026

5K ARTISTS

- Public launch
- Church network activated
- £1M ARR achieved

2027

75K ARTISTS

- €29M revenue
- Series A funding secured
- International expansion

2030

◆ 500K ARTISTS

- €170M revenue
- Carbon-neutral certified
- B-Corp status
- Market leadership
